## Serba Dinamik, Nicol & Andrew sign MOA for sales and services

**KUCHING:** Serba Dinamik Holdings Bhd (Serba Dinamik) yesterday signed a Memorandum of Agreement (MoA) with Nicol & Andrew Group (Nicol & Andrew), a renowned world leader of on-site repair technology and on-site repair services based in High Wycombe and Glasgow in the UK.

The MoA involves Nicol & Andrew's patented revolutionary Orbitool process and equipment that encompasses maintenance, repair and overhaul (MRO) of all rotating and static equipment such as gas and steam turbines, generators, compressors, pumps and boilers for the O&G, Power Generation, Marine and Water industries.

These include on-site machining, in-situ electroplating, on-site and workshop honing services, la-

ser alignment service and equipment hire, hydraulic cylinder repairs and refurbishment.

In the oil tool repair industry, the local presence represents significant time saving on return to service times and at favourable costs to our customers.

Serba Dinamik's group managing director and group chief executive director Datuk Dr Mohd Karim Abdullah said the working arrangement will enable Serba Dinamik to offer on site machining and repair services to both new and existing customers, 24-hours/365-days a year wherever the group has a presence.

The group from their fully equipped machine shops will be able to provide a mobile solution to be better as a total engineering services provider in a wider area and industry, thereby keeping

us closer to our business growth strategies and affirm our market presence in the industry.

With N&A Technology and Serba Dinamik's strategic locations we will provide oiltool repairs and overhauls the benefits of reduced time, cost and logistics. We are optimistic that the new contract will contribute significant revenue to the group over a span of the next 5 years."

The agreement will benefit both parties as Nicol & Andrew's services will enhance and strengthen the group's capabilities by offering these services from all their national and international locations leading to time and cost savings to customers.

It is naturally synergistic for the group to partner with Nicol & Andrew to further enhance its presence as the premier Total

Services Provider for the Oil & Gas, Petrochemical, Power Generation, Water & Wastewater and General Industries.

Duncan Graham, managing director of Nicol & Andrew, who foresees that this partnership will strengthen the position of both organisations stressed, "This UK/Malaysian partnership demonstrates the best way forward to provide our customers worldwide with the timely and cost efficient services they deserve.

"We look forward to expanding our work together with Serba Dinamik. Many of our customers are situated in isolated areas making the cost to repair away from site prohibitive and with unreasonably long turnaround times. Many of our highly flexible mobile tools are designed and built in our own workshops."
